

# Catalyst Pancreatic Lipase Test algorithm

\*If abnormalities are present and suggestive of another disease, the pancreas is also likely involved but not the sole cause of the clinical signs (foreign body, kidney, liver, endocrine).

# Interpreting a Catalyst Pancreatic Lipase Test result

Perform the Catalyst® Pancreatic Lipase Test if clinical signs<sup>†</sup> of pancreatitis are present or if lipase on chem 17 profile is substantially elevated<sup>‡</sup>

<sup>†</sup>Clinical signs of pancreatitis may be vague and nonspecific, especially with chronic pancreatitis.

<sup>‡</sup>Approximately 3X above the reference interval.
